Education

Zhejiang University

2021 – Present

B.S. Computer Science and Technology

- 4.86/5.0 with 62 credits
- 4.73/5.0 with 81 credits

1/977 (Department of Informatics)

5/146

Minor Chu Kechen Honored College: Advanced Class of Engineering Education (ACEE)

Research Experience

Zhejiang University, supervised by Yang Yang

2023.1 – 2024.2

University of HongKong, MMLab, supervised by Luo Ping

2023.7 – 2023.10

National University of Singapore, NEXT++

2023.11 – Present

Publication

[One Foundation Model for All Dynamic Link Prediction](#) (*co-first author*)

under review

TL;DR: This work proposes DyExpert, an autoregressive model consistent with the GPT-2 architecture, which is a foundation model for link prediction on dynamic graphs.

[Auto-Encoding Morph-Tokens for Multimodal LLM](#) (*fifth author*)

under review

TL;DR: We propose Morph-Tokenizer, which enables multimodal LLMs to possess simultaneous visual comprehension (textual output) and generation (visual output) capabilities.

[Rethinking the Scoring Restrictions of Attentive Graph Neural Networks](#) (*second author*)

under review

TL;DR: We propose using non-linear combination activation modules to address the issue of node order in Attentive GNNs, further enhancing the capability of Attentive GNNs.

[Exploring Correlations of Self-supervised Tasks for Graphs](#) (*second author*)

under review

TL;DR: We uncover the inherent correlations for various graph self-supervised tasks and propose a new method to achieve more expressive embeddings.

Project

[Making Diffusion Model acquire multi-resolution generalization ability](#)

Contemporary diffusion models struggle with varying image resolutions, leading to lower output quality. I propose a new up-sampling and down-sampling module to replace traditional methods, enhancing models' ability to handle different resolutions. This approach greatly improves scale generalization, enabling models to produce outputs at diverse resolutions, even ones not encountered during training.

Other Experience

Teacher Assistant in Zhejiang University

[211G0300] Fundamentals of Computer Science (B), 205 students

2023Fall

[2114N001] Introduction to Artificial Intelligence, 42 students

2023Fall

[211G0239] Introduction to Computer Science, 98 international students

2023Fall, 2024Spring

Honors and Awards

National Scholarship of the People's Republic of China

2022, 2023

The First Class Scholarship in Zhejiang University

2022, 2023

Learnings Research and Innovation Scholarship

2023

The International Mathematical Contest in Modeling (ICM) Meritorious Winner

2023
